

Mission Statement

The Magnetic Resonance Imaging program is a joint venture between West Virginia University Hospitals and the Center for Advance Imaging at West Virginia University. Our combined mission is to provide comprehensive didactic and clinical education in Magnetic Resonance Imaging; thus affording radiologic technologists with the necessary skills for professional growth and career advancement in the imaging sciences. With our progressive technology and our commitment to medical education, our program provides the foundation on which students can cultivate and expand their imaging skills in the Magnetic Resonance discipline. Through our inclusive academic curriculum and our diverse clinical experience, students are afforded the knowledge and expertise that will meet the needs of the communities they serve while providing a solid foundation for life-long learning and professional development.

Goals

1. To facilitate student learning through the integration and application of didactic theories in clinical practice.
2. To provide students with diverse and comprehensive educational opportunities that promote the development of effective communication and critical thinking skills
3. To reflect programmatic quality to patients, employers, and other institutions through the development of dedicated, ethical, and conscientious students.
4. To reflect programmatic quality to patients, employers, and other institutions through the development of technically and professionally qualified Magnetic Resonance technologists.
5. To provide students with an environment that supports and promotes professional growth and development.
