

Mission Statement

The Radiologic Technology Education Programs at West Virginia University Hospitals primary mission is to facilitate the growth and development of the professional in the Radiologic Sciences. Through continued technological advancement and a strong commitment to education, West Virginia University Hospitals serves as the foundation on which students can cultivate and expand their knowledge of the technical, professional, and philosophical aspects of Radiologic Technology and the health care environment. The program strives to provide our students with an educational environment that is conducive to attaining positive learning outcomes and is comprehensive in providing clinical experience and patient care opportunities.

Goals

The program serves our students, our customers, and our patients by acting as a mechanism by which the following goals are attained:

1. To facilitate student learning through the integration and application of didactic theories in clinical practice.
2. To provide students with diverse and comprehensive educational opportunities that promote the development of communication and critical thinking / problem solving skills.
3. To assure exceptional quality to patients, employers, and other institutions through the development of dedicated, ethical, and conscientious students.
4. To assure exceptional quality to patients, employers, and other institutions through the development of technically and professionally qualified individuals.
5. To provide students with an environment that supports and promotes professional growth and development.
